

## Specifications

---

Cleardesk has been designed and manufactured in New Zealand based on a European design.

Cleardesk is a clear, writing surface and copyholder for use between your keyboard and computer monitor. If required it will span your keyboard allowing you to view the keyboard through the desk, perfect for situations where the desk is not deep enough. Adjustable tri-knobs enable you to easily select and set the front height to

two settings and a number of settings at the back enable you to vary the angle of the slope of the Cleardesk.

The front ledge is large enough to enable the Cleardesk to hold your copy but small enough for you to write comfortably (with either hand) without the ledge obstructing your wrist movement.

Order code: **741CDM**

There is also another model available with a wider, 500mm front ledge to support larger (or multiple copies of) documents.

Order code: **741CDML**
