Specifications

From small to tall and body types in between, the Freestyle2 allows for maximum flexibility catering to each individual's unique needs. Both modules are connected by a flexible pivot tether allowing an infinite range of splay. Disconnecting the pivot tether allows up to 230mm of separation between the left and right keying modules. The design greatly reduces and/or eliminates ulnar deviation. The Freestyle2 has a zero degree slope whichminimizes the height and reduces wrist extension. The slim design provides youa 2-in-1 office and travel keyboard. Driverless hot keys for commonly used mouse actions. (Internet Page Forward and Back, Undo, Web Home, Cut, Copy andPaste). A vertical rib is located on the inside row of hot keys to provide tactile notification to the user.

Compatible operating systems Windows 2000, XP,Vista, Windows 7 and Windows 8, Sun & Linux
