Specifications

Penclic Mini keyboard and Penclic Number pad have been designed to give the user an attractive keyboard which also provides great ergonomic advantages, functionality and comfort without sacrificing comfort for size. An optimal 6mm profile thickness, full size, quiet touch, flat, normal size keys and reduced size (only 285mm wide) are all added benefits which create a healthy working position. The mini keyboard has been designed to increase user comfort and functionality while also allowing users to free up much needed desk space. Full size, flat quiet touch keypads make it easier to type. The compact size and low keys allows a more central and healthy working position letting you mouse closer to your body...
